

Dear Dr. Casas-Ruiz,

We are writing to let you know that your article, “A tale of pipes and reactors: Controls on the in-stream dynamics of dissolved organic matter in rivers” **has been selected as one of 20 outstanding articles published in the ASLO journal portfolio from 2016 - 2017**. We would like to take this opportunity to congratulate you AND thank you for your excellent contribution to the ASLO journals. It is because of authors like you that our journals continue to be some of the highest ranked in the areas of Oceanography and Limnology.

As a member of this selected group of authors, we, the editors of the ASLO journals, would like to invite you to present in a special session titled “**Author spotlight: recent high-impact authors from the ASLO journals**”, at the upcoming Aquatic Sciences meeting in San Juan, Puerto Rico, February 24-March 1st, 2019. The session will be held on March 1st and will be followed by the celebratory dance Fiesta on the roof of the conference center. In appreciation of your outstanding contribution to our publications, the ASLO Board of Directors has agreed to waive your meeting registration fee, should you participate in this session as the presenter.

If you accept this invitation, you are free to present on several different potential topics related to the article, for example: updates to the research described in your article, your current research direction, or a review of the current state of your field of research. If you are not able to attend the meeting, you may pass this invitation to one of the co-authors of your selected article.

We ask that you respond to our invitation before October 8, 2018 so that we may plan the session. If you accept, we will provide instructions and a special registration code for submitting your abstract.

We sincerely hope that you will be able to join us and look forward to seeing you in San Juan!

Sincerely,

Chris Filstrup, Deputy Editor, Limnology and Oceanography Bulletin
Paul Kemp, Editor-in-Chief, Limnology and Oceanography Methods
Patricia Soranno, Editor-in-Chief, Limnology and Oceanography Letters
Adrienne Sponberg, Editor-in-Chief, Limnology and Oceanography Bulletin
Marguerite Xenopoulos, Deputy Editor-in-Chief, Limnology and Oceanography
